**“[Indepth Creative] systematically pulled our project apart and put it together using nothing but the very latest technology with very impressive results. Our website and web application are visually appealing, user-friendly and functional. We could not have hoped for a better result.”** *Melanie Perkins and Cliff Obrecht, Directors, Fusion Books*

Making an annual or yearbook is a typically time consuming affair - designing each and every page, collecting photos, stories and profiles, sourcing printers and organising delivery. Fusion books knew there must be an easier way - an online, collaborative way.

Fusion Books came to Indepth Creative with the idea of simplifying the creation of yearbooks. The concept of users uploading, editing and rearranging images and texts online at their convenience was a challenge which other companies were hesitant to take on. However Indepth Creative employed flexibility to accommodate the needs of Fusion Books, overcoming technical difficulties to develop the technology to do all of this. Another feature of Indepth's system is the ability for the annuals to be converted online from the RGB colour spectrum emitted by the computer monitor, into print ready CMYK colours.

By drawing upon the skills of both the design and interactive team, Indepth created a technically sound and innovative project, which is user-friendly and visually appealing. Now both students and teachers can securely login to the Fusion website, customise all aspects of the yearbook, and have them printed and delivered. With multiple logins the huge task no longer falls to just one person, making the whole operation fast, more efficient and most importantly a collaborative effort.

“While the complexity of our project stumbled many companies along the way, some even suggesting we needed to explore software companies in California, [Indepth Creative] systematically pulled our project apart and put it together using nothing but the very latest technology with very impressive results. Our website and web application are visually appealing, user-friendly and functional. We could not have hoped for a better result.” *Melanie Perkins and Cliff Obrecht, Directors, Fusion Books*

Working within a short time frame, the Indepth team created high quality design and intelligible functionality, providing an effective solution to simplify the online creation of yearbooks and annuals.

“The incredible success Fusion Books is experiencing through Australia and internationally is a fantastic tribute to the hard work of [the Indepth] team.” *Melanie Perkins and Cliff Obrecht, Directors, Fusion Books*
