News

Welcome to Your New Website

Welcome to the City of Belmont's new website. In developing this website we have focused on making information easily accessible and user-friendly.

Creating Opportunities

The City of Belmont is proud to launch the next stage of our opportunity journey – the Creating Opportunities Campaign.

Events

National Youth Week Event

National Youth Week is celebrated Australia wide from April the 5th to the 13th. Friday the 11th of April is the City of Belmont's Youth and Family Services National Youth Week Event.

April 2008

“Indepth Creative developed a MOSS solution that allowed City of Belmont to take control of its’ web presence.”

Looking for a place to live or invest, develop your business or enjoy a community lifestyle? Then the City of Belmont is the place to be, with plenty of opportunities just waiting to be discovered.

To encourage the discovery of these opportunities, City of Belmont came to Indepth Creative with the idea to develop an information portal that was linked to their intranet and document management system.

Indepth Creative devised a linked intranet and internet solution, with an industry leading Microsoft Office SharePoint Server (MOSS) that allowed City of Belmont to take control of its’ web presence. Now able to manage and share contacts, tasks and documents in a secure online workspace, City of Belmont moved on from the defunct Alpha West ‘Site Manager’ system, to utilise a system that encourages growth. An invaluable tool for collaboration and workflow organization, MOSS streamlines users and management to easily update content on the web.

The new Indepth solution redeveloped both the intranet and extranet into a modern and flexible system, allowing information to be shared and accessed from any location. City of Belmont’s existing Data Work applications were transferred into the new SharePoint document management system, to further simplify operations.

Indepth Creative took the time to analyse and develop the working requirements and specifications for City of Belmont, integrating the entire system and providing hosting services for an External Facing Website.

All of this is accompanied by a contemporary website design, housed within a user friendly framework.
